# CPM Lineator
## for Pellet Mills

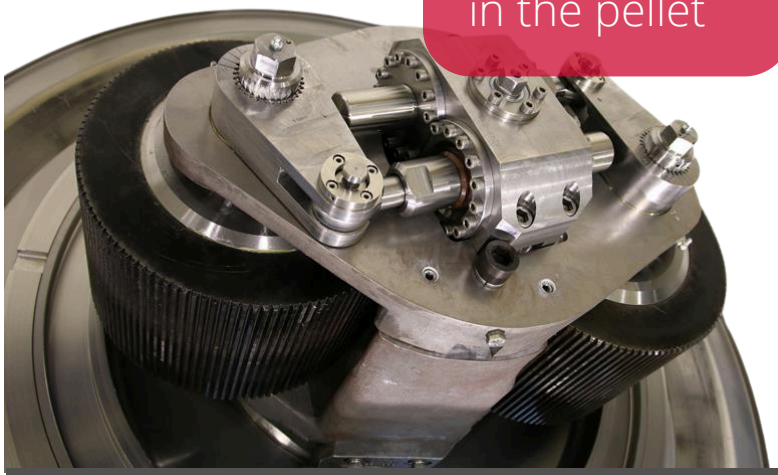

ONECPM.COM

**REMOTE ROLLER ADJUSTMENT**

**OPTIMUM PELLET QUALITY**

**MAXIMUM THROUGHPUT**

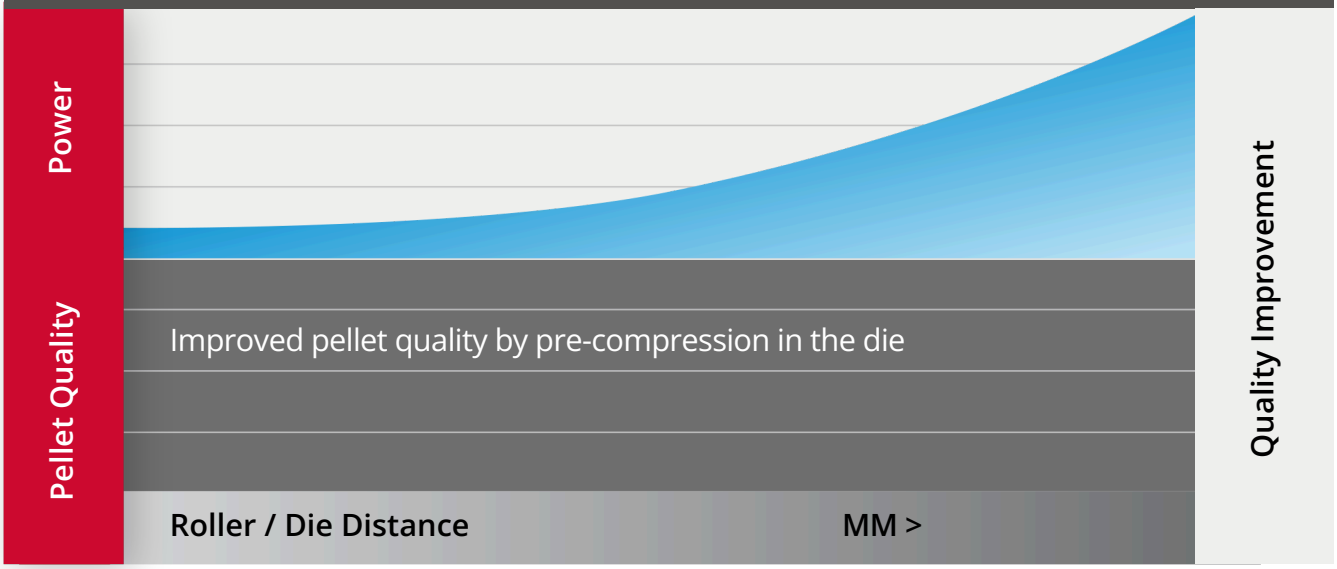

Up to 20% more energy in the pellet

### WHY CPM LINEATOR?

- Variable die specification
- Increased service of life of dies
- Reduce operating cost
- Increase safety
- Easy handling
- Time saving
- Stronger pellets

### ROLLER GAP VERSUS PELLET QUALITY

# How CPM Assists You in Producing **Quality Pellets**

CPM's Lineator is a remote-controlled roller adjustment system that provides safe, precise, and fast roller adjustment during pellet mill operation.This solution helps reduce operating costs by minimizing valuable production downtime. Most roller adjustments can be made without stopping the pelleting line, and downtime during pellet mill inspections is significantly reduced.

Operators can easily and safely adjust rollers from a control panel without opening the pellet mill door. The compact design also allows for quick and efficient die and roller changes. Because the system contains no hydraulic components, there is no risk of oil contamination, resulting in simpler maintenance.

Remote roller adjustment enables real-time optimization of pellet quality and maximizes throughput, helping operators maintain peak performance with minimal interruption.

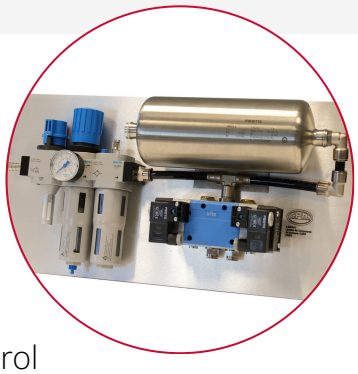

## Lineator Control Panel

- Distance between the rollers and the die can be adjusted manually or by PLC
- The roll speed measurement presentation provides you with more control over the pellet quality and durability

## Why do we measure the roll speed?

When a roller is not rotating effectively, the mill can choke. Using correct distance between the rollers and die creates optimal pre-compression, resulting in stronger, higher-quality pellets.

## Pneumatic Componenets Assembly

- Air pressure control
- Drying and lubricating the compressed air for the Lineator air motor

From the food you eat to the fuels you require, CPM plays an important role in building a better world. Our experienced team and family of trusted brands are working together to make our planet a better place to live.
